Advancing elections for 100 years.

All prices are effective as of January 1, 2013.

If you still can't find exactly what you need, call 1-800-223-HART.

As always, we welcome the opportunity to serve you.

F E A T U R E D I T E M S

Reduce lines
and improve
accuracy at
the polling
place.

Modernize ePollBook

Hart's ePollBook addresses the demands of long wait times at the polling location, high print costs, and exception handling procedures. The ePollBook streamlines the voter check-in process. In a few simple steps the poll worker can quickly and accurately locate a voter's record and update voting history.

See page 23

Automate

Absentee Processing System (APS)

Breeze through your mail ballot processing and save time and resources. Hart's APS manages absentee status from the initial request to recording the final disposition of the ballot. APS also integrates with Hart's ePollBook by automatically updating the absentee status during Early Voting.

Call for pricing.

Equipment Summary

eScan

The eScan is a precinct-based digital scanner that ensures secure, accurate and reliable paper-based voting. Providing second-chance voting, dual-sided scanning, and fast flexible reporting, the eScan is the choice of voters around the country.

Judge's Booth Controller (JBC)

The JBC is the polling place control console that ensures correct ballot information is transmitted to each of the eSlates. It also serves as an electronic ballot box, with printing and reporting capabilities.

eSlate and DAU eSlate

The eSlate voting machine allows voters to cast electronic ballots by turning a rotary SELECT wheel. Specially modified Disabled Access Unit (DAU) eSlates allow voters with disabilities to use headphones or other adaptive devices to vote privately and independently.

Verifiable Ballot Option (VBO)

The VBO works with the eSlate to automatically create a paper audit trail as a voter completes an electronic ballot. The voter can review a paper summary of the ballot choices before the vote is cast.

eScan

The eScan is Hart's fully integrated digital ballot-imaging unit for polling place voting. It uses paper ballots produced by the Hart Voting System Ballot Now software and stores votes on an election-specific flash memory card. Second Chance Voting, dual-sided scanning and jurisdiction-wide election reporting are all supported.

Includes:

- 1 eScan scanner
- 1 eScan ballot box
- 1 PC card (MBB)
- 1 power supply
- 1 power cord
- 2 paper rolls

Judge's Booth Controller (JBC)

The JBC is the polling place control console that manages as many as 12 eSlate voting units. Using election data on a PC memory card called a Mobile Ballot Box (MBB), the JBC controls the ballot styles displayed on the eSlate, ensuring that every voter receives the correct ballot. Results can also be printed from the device.

Includes:

- 1 JBC 1000B
- 1 PC card (MBB)
- 1 power cord
- 2 battery packs
- 1 serial connection cable
- 2 paper rolls

\$3,300.00 each

Part number 1001-900

eSlate Booths

The eSlate booth's hard case serves both as a polling place voting station and as a collapsible storage unit for eSlate voting devices.

Standard Booth—Assures private, comfortable, independent voting and secure storage and handling for the eSlate, DAU, and VBO voting devices.

DAU Booth—Designed for wheelchair access, including wide-set legs, a steeper angle of view, and lower height. The booth is compliant with the accessibility requirements of the Help America Vote Act of 2002 (HAVA).

For replacement parts, see page 14.

System Software

Hart Voting System software offers complete election management to our customers. Our basic software suite includes BOSS, Ballot Now, Tally and SERVO, which enables customers to create ballot formats, print and scan ballots, tabulate results, and backup equipment.

Additional software includes Rally, for remote electronic transfer of results to the central count station, and FUSION, InFUSION, TAG, TRACK, and SCORE for data integration, tracking, and customized reporting.

Custom software services are also available.

Please call for current pricing.

More Software

Access Code on Demand
Ensures accurate JBC Access Codes based on VR/Electronic Poll Book data.

Rally
Satellite station MBB reading and transfer to Tally

FUSION
Results data integration and customized tabulation reporting

InFUSION
Enables formatting of election data for import into BOSS

TAG
Asset management tracking for your election products

TRACK
Allows voters to confirm the processing of their Ballot Now paper ballot via the web

SCORE
Web-based election results reporting and display

Basic Software Suite for the Hart Voting System

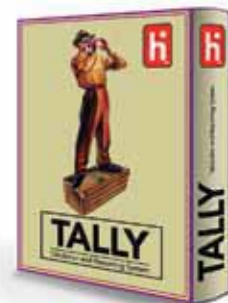

Ballot Origination Software System (BOSS)
HVS ballot generation software

Ballot Now Server
Paper ballot printing, digital scanning, and resolution software
Ballot Now Client
Paper ballot image processing and resolution software

System for Election Records and Verification of Operations (SERVO)
Backup, recovery and voting hardware audit logs viewing and printing

Tally
Tabulation and reporting software

Software Manuals

Hart software is fully supported through our operations and training manuals. To fill printed materials orders, please answer the following questions on the order form:

1. Part Number
2. HVS System Version
3. eSlate only or eSlate and eScan
4. Multi-lingual or English only ballots
5. VBO (paper audit trail)—Yes/No
6. Type of election (General, Primary, Special)

Please note there is a minimum order of 5 for printed materials.

ElectionReady Services

As election administration becomes increasingly complex, there are times when you need extra support from the people you trust. Hart can help you achieve success with the ElectionReady family of professional services.

Our services are so comprehensive that we have dedicated an entire brochure to describe these offerings. Prices have recently been lowered and are based on location. Call us and we can customize a service offering to meet your needs and your budget.

Services we offer

Consultation and Training

Whether you are a novice or an experienced Hart customer, we've got a wide variety of courses to suite all your needs. Refer to the *ElectionReady Services*

Best Practices Suite catalog for descriptions of available offerings for HVS software and hardware. Don't miss our newest offerings—*Advanced Skills Training and Ballot Design Training and Services*.

Maintenance Services

Assure success for every election with Hart's preventative maintenance services. Keep your eScans, JBCs and Ballot Now

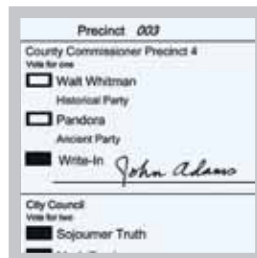

scanners in proper working order. Services may be performed at your location or at Hart's facility. Refer to the appropriate section in this catalog to learn more about these programs.

Professional Services

When you are short-handed or just need some additional election expertise, Hart's election professionals have the skills that are right for the job. Refer to

the *ElectionReady Services Best Practices Suite* catalog for descriptions of available offerings, including Election Day on-site support and customer services.

Ballot Production Services

Hart offers ballot programming and printing services for electronic and paper ballots. Pricing includes ballot layout, audio, proofs, programming, and up to 1,000 printed ballots. Pricing is determined based on the number of races and, in some cases, the State in which the election is being held.

ePollBook

The ePollBook is Hart's affordable, secure, and reliable way to quickly locate and accurately update a voter's record. The large type, easy to read screen, and simple search techniques ensure the correct voter is found every time. As a result, the entire check-in process is faster. The ePollBook comes packaged in a durable case designed for easy storage and transport to your polling places. (Also available in a software only version.)

Includes:

- Touch screen NetBook with 6-hour battery
- Driver's License Card Scanner
- Label Printer with two label rolls
- Combination Form Template
- Hard-sided carrying case
