Electronic Voting

VERITY™

Smart Technology for
Trusted Elections.

HART *intercivic*™

The Verity electronic solution includes:

- ### Verity Touch™
  direct record electronic voting device

- ### Verity Access™
  optional accessible controller

- ### VVPAT
  optional paper audit trail

Electronic Voting

Verity offers the only truly modern all-electronic voting solution in the marketplace today—all the efficiency of managing ballots electronically, plus the newest technology designed to conform with the VVSG 1.0 (2005) federal standards.

Whether your jurisdiction is small or large, Verity offers the very best usability for voters and election personnel, and easy deployment on a compact hardware platform. Simple. Adaptable. Trusted.

Smart Technology for Trusted Elections.

Usability	Accessibility
Adaptability	Easy Deployment

How to Vote with Touch

1 Check-in
Voters check in, using your jurisdiction's typical procedures

2 Receive access code
Poll workers select voter's ballot style and issue the voter a randomized Access Code "ticket"

3 Mark ballot
To activate ballot, voters enter Access Code on Verity Touch

4 Cast ballot
Voters review choices and cast the ballot

Usability

- Voters activate their own ballot with a poll-worker distributed Access Code— no activation cards or other accessories required
- Superior interfaces for clarity and confidence; friendly approachable, and easy to understand
- Design that feels natural to use

Adaptability

- Connect multiple Verity Touch units in a single chain, if desired
- Open and close polls from a single poll worker management console, for fast startup and shutdown
- Optional VVPAT component adds a paper audit trail

Accessibility

- Optional Verity Access component adds tactile buttons, audio ballots, and compatibility with common adaptive devices
- Fewer buttons, naturally intuitive
- Tactile edges and dished buttons

Easy Deployment

- Compact, integrated case for easy storage, transport, and setup
- Smart polling place accessories
  - Lightweight and low profile for easy deployment, setup, pack up and storage

KEY FEATURES:

- Designed to conform with VVSG 1.0 (2005) federal standards

- Superior voting interface design for best usability—inspired by AIGA's "Design for Democracy"

- Small polling place devices with integrated secure case (18"L x15.5"Wx6"H)

- 12" touchscreen display
